Messages

Shivraj Singh Chauhan

(Chief Minister, Government of Madhya Pradesh)

I am happy to know that 5th World Ayurveda Congress is being organized at Bhopal from 7 to 10 December 2012. The

Government of Madhya Pradesh is extremely happy to join hands with the World Ayurveda Foundation in organising this mega event. I understand that this year the deliberations at the conference will focus on the issue of 'Public Health'. Ensuring the well-being of people, especially the poorer section, has always been a challenge to people like us. While we face this challenge through the modern medical perspective to a large extent, I am aware that our own traditional system of medicine, Ayurveda, can offer viable and affordable solutions to the health problems that people face today.

To the extent, the Government of Madhya Pradesh eagerly looks forward to the policy suggestions that the 5th World Ayurveda Conference will present us with. We wholeheartedly welcome this initiative and wish the event all success.

Sam Pitroda

Adviser to the Prime Minister of India on Public Information Infrastructure and Innovations and Chairman of the Expert Committee on the use of ICT in Railways

For a comprehensive solution to our health-care shortcomings, we need to adopt the traditional Indian model in the health-care system.... The Indian health-care system reaches out to the bottom of the pyramid while the Western method of health care reaches only the top of the pyramid.

S Gandhiselvan *(Minister of State for Health and Family Welfare, Government of India)*

I am happy to know that 5th in the series of the World Ayurveda Congress is being organized in Bhopal in December 2012. I understand that the previous four editions of World Ayurveda Congress have been a great success in spreading the message of Ayurveda – the knowledge of life. I am sure that such events will help accelerate the revival of Ayurveda in the society, which is a must for building a healthy nation. I hope the participants of this upcoming 5th World Ayurveda Congress will find success in getting the right direction, scientific perception as well as availing knowledge, information, business or technology, as they may be seeking in this greatly divergent, yet largely inclusive event. I wish the Congress all success.

Dr Vijay Bhatkar *(President, Vijnana Bharati & Chairman, Board of Governors, IIT Delhi)*

The World Ayurveda Congress attracts Ayurvedic scientists from all over the world, who are interested in furthering their professional practice and competency. It also receives strong patronage from policy and decision makers actively engaged in charting the future course of Ayurveda. The 5th World Ayurveda Congress will focus on the theme 'Enriching Public Health through Ayurveda'. The Congress will provide numerous opportunities for professional networking, and provide stimulus to new and original projects. It will feature a wide range of therapeutic innovations and initiatives that have resulted in improvements in patient outcomes and the health system in general. I hope that you will join us at what promises to be a memorable Congress.

Anil Kumar, IAS *(Secretary, Dept. of AYUSH, Ministry of Health & Family Welfare, Govt. of India)*

I am happy to know that the 5th World Ayurveda Congress is scheduled to be organized in Bhopal in December 2012. It is expected to be a unique event wherein the state governments, institutions, NGOs, Ayurveda practitioners, drug manufacturers, and cultivators congregate in large numbers and discuss critical issues which are very relevant to the development of this sector. I am sure the World Ayurveda Congress will lead to the promotion and propagation of Ayurveda, both within the country and abroad. I wish the Congress all success.

Actively Supported by:

**DEPARTMENT OF AYUSH
MINISTRY OF HEALTH & FAMILY WELFARE
GOVERNMENT OF INDIA**

World Ayurveda Congress

Propagating Ayurveda for Global Health Care

Advancement in modern sciences and paradigm shift in assessing the therapeutic value of old and existing medical practices often lead to the questioning of traditional approaches. Hence, sustenance of traditional sciences requires strong advocacy. Forums and groups that bring out the continued relevance and nuances of traditional therapies such as Ayurveda create a sure-footed impact over time.

Ayurveda- the 'science of life' is the source of most health care systems. However, like all things ancient and traditional, the practice of Ayurveda was beset with challenges, especially at the turn of the 20th century. At this point of time there was a strong felt need for a credible platform that would potentially disseminate authentic, unbiased, comprehensive information to national and global audiences. Acknowledging this need, Vijnana Bharati, as part of its Swadeshi Science Movement organized the first World Ayurveda Congress (WAC) in 2002 at Kochi. WAC was to grow into

a potential platform to propagate Ayurveda during the new millennium. It is to be noted that despite the stated challenges, global awareness of Ayurveda was on the rise during this period. Increasingly, people across the world were re-discovering Ayurveda as a panacea for lifestyle-related and chronic diseases. Also, there was new evidence to validate Ayurvedic scriptures, thus piquing interest in this science.

Over 10 years and through four Congresses, the WAC has emerged as a global platform for all stakeholders for networking and engaging in intellectual exchange to strengthen the Ayurveda sector, reaffirm their sense of purpose and envision the future. WAC showcases advances in relevant fields, orients students and facilitates interaction between professionals and consumers, thus boosting Ayurveda commerce.

Commerce

The annual reports of the Department of AYUSH (Ayurveda, Yoga, Unani, Siddha, and Homoeopathy) confirm that the popularity of Ayurveda and Ayurveda commerce have improved tremendously since 2002. Foreign trade of AYUSH products increased by 48% over the previous year- a rise of ₹5862 million. The figure touched ₹13,119 million in 2009/10, as per data available from DGCIS and Pharmexcil Research (see Table). The trade in AYUSH sector has been growing at CAGR of 20%–25% since the first WAC in 2002. Bulk of the trade related to AYUSH is contributed by Ayurveda. This international trade in botanicals is second only to China and that too by just a whisker. That day is not very far where the need for Indian botanicals will rise phenomenally with a backdrop of proven use over 5000 years under the scientific rationale that Ayurveda offers.

Bigger budget

There are reasons to believe that the policy recommendations of WAC have influenced directly or

Table 1 Exports of India's Ayush and Herbals (₹million)

Category	2007/08	2008/09	2009/10
Ayush	3925.5	6667.7	7411.5
Herbals	4701.2	5948.7	5707.6
Grand Total	8626.7	12616.4	13119.1

Source: DGCIS, Pharmexcil Research

indirectly the perspectives of central and various state governments towards this sector. The following facts corroborate the above statement to some extent.

- There have been increases in state budgetary outlays for Ayurveda in the states of Kerala (since first WAC in 2002 in Kochi), Maharashtra (since second WAC in 2006 in Pune), Rajasthan (since third WAC in 2008 in Jaipur), and Karnataka (since fourth WAC in 2010 in Bengaluru). Many other states also have taken similar initiatives.
- In 2003, the Government of India provided Kerala with ₹2877.5 million via a scheme for hospitals and dispensaries, a humongous increase over the ₹50 million allotted in the previous year. Maharashtra received ₹2167.5 million in 2006, a substantial improvement over the ₹178.9 million allotted in 2005.
- The Ministry of Railways has included Ayurveda in the health scheme of Railway employees and initiated 39 Ayurvedic dispensaries across India.
- The Ministry of Coal and Mining has included Ayurveda for the occupational hazards management of miners and started 16 Ayurvedic dispensaries in coal/lignite mines in Central India.
- In 2009/10, with due credit to the Department of AYUSH, Government of India, 2368 doctors and 2184 para-medics were appointed. AYUSH practitioners, mostly from the Ayurveda stream, have been co-located in 1918 public health centres, 171 community health centres, and 46 district hospitals. The Department of AYUSH also initiated several public health campaigns such as 'Ayurveda for Anaemia' and 'National Campaign on Amla'.

In fact, the activities of WAC have paved the way for well-organized pro-Ayurvedic movements around the world. To propagate the practice, science and trade

इतनेः बेद्युतनेः

– Charaka Samhita

of Ayurveda, WAC organizes events and scientific discourses across the globe. It takes keen interest in trade improvement, acceptance of Ayurveda as a medical system, registration of Ayurvedic practitioners and popularization of Ayurveda drugs in various countries.

Goals

Having established itself as a vital platform for Ayurveda, WAC has set itself the following goals for the future (2009–14).

- To facilitate acceptance and recognition for Ayurveda as a complete health system adoptable in all countries across the world
- To create appropriate platforms for 'scientific backing' of Ayurveda along with suitable infrastructure to popularize the outcomes
- To make Ayurveda an integral part of health-care management.

Within the larger objectives, the specific key achievables identified are as follows:

- To create interest groups in 30 countries including those in the European Union, Association of South-East Asian Nations, the United Arab Emirates, and North America
- To formulate international peer-review panels in basic and medical sciences for credible guidance and validation of research
- To initiate the creation of a network of medical institutions, laboratories, and universities across the world for aiding joint research and creating a database of management efficacy of Ayurveda.

5th World Ayurveda Congress & AROGYA Expo 2012

The World Ayurveda Foundation (WAF) is one of the major outcomes of the 4th World Ayurveda Congress. Initiated and mooted by Vijnana Bharati, the Foundation has the backing and blessings of the dignitaries and Ayurveda practitioners, from both within the country and overseas. This umbrella organization will focus on furthering the cause of Ayurveda, and popularizing it across the world.

As the first step WAF is organizing the fifth edition of the World Ayurveda Congress and AROGYA Expo with its theme as *'Enriching Public Health through Ayurveda'*. Scheduled to be convened in **Bhopal (Lal Parade Ground), Madhya Pradesh, from 7 to 10 December 2012**, the Foundation looks forward to consolidating the momentum of this forum and providing a robust boost to the global popularity of Ayurveda and associated fields. With nearly half a million visitors and about 5000 delegates expected to attend this year, the Congress is reinforcing its identity as a global summit that brings together diverse stakeholders of Ayurveda on to a common, meaningful, and popular platform.

In the associated expo, Arogya 2012, the spotlight this year will be on traditional and tribal knowledge in health-care systems from India's rural and tribal communities, especially from Madhya Pradesh and the north-eastern states.

The Government of Madhya Pradesh and WAF invite all interested delegates to the academic and business sessions and to all associate events of the 5th WAC (detailed in the following pages).

'Enriching Public Health through Ayurveda'

Focal Theme of 5th WAC

Public Health is defined as the practice of improving and aiding the physiological wellness of community members through research, concentrated communication and specific programming. Some common public health indicators are birth rate, fertility rate, life expectancy, etc. In many of the developing and under-developed countries, these public health indicators present a poor picture.

Health profile

Public health in India is still finding its feet working out public-private partnerships. India recently scripted a huge success story of eliminating polio in early 2012. However, India is lagging behind, particularly in the maternal and infant health sphere. In 2009, there were 2.6 million still births, 57 infants out of every 1000 live births died, and 450 out of 100,000 women

die giving birth. Over 50 million people are suffering from diabetes. India loses 3 persons every 2 minutes to tuberculosis. In 2004, Indians spent ₹846 billion on health-care. Life expectancy varies across continents, with Europe leading at nearly 80, whereas in Asia, it is around 70, and in Africa, about 55.

Role of Ayurveda

In ancient India, Ayurveda played an important role in the health of the society. In contemporary India, it is playing an active role in states that have good health indices such as Kerala. This is an attractive proposition, as it has been proved that Ayurveda can show results in a faster time frame and at a far less cost, taking into account factors such as the infrastructure, high input cost, and high cost of modern medical infrastructure.

WAC Agenda

The 5th WAC addresses the theme of '*Enriching Public Health through Ayurveda*'. The Congress will not only dwell upon how health indices in India's poorer states such as Bihar, Madhya Pradesh, Rajasthan, and Uttar Pradesh can be revitalized, but also on maintaining and enriching public health in states that traditionally perform well in health indices. It aspires to pitch the Indian experience as a model story for implementation and replication in countries with similar financial and infrastructural capabilities across the globe.

The Congress will cover all these aspects of Public Health through goal-oriented seminars in plenary and several of its parallel sessions. It will offer a converging stage to well-known researchers, academicians, public health experts, economists, physicians, scientists, and other thought leaders. Research papers on the subject from various institutions will also be presented for deliberations.

Madhya Pradesh...

Madhya Pradesh is one of the largest Indian states, with a population of about 70.5 million. 49% of its population live below the poverty line. Infant mortality rate at 70 and maternal mortality ratio at 335 are well below the national average. Madhya Pradesh Health Sector Reform Programme (MPHSRP) aims to bring about structural and qualitative changes in health access, infrastructure and quality.

The Hon'ble Chief Minister of Madhya Pradesh, Shri Shivraj Singh Chauhan is instrumental in bringing about a new approach that combines traditional and modern methods to tackle public health issues.

This is where, a traditional, cost-effective and simple science like Ayurveda can work wonders. The state is endowed with an abundant range of medicinal plants. The vast resource coupled with ubiquitous, indigenous knowledge of traditional medicine, and wide availability of qualified Ayurvedic physicians make Madhya Pradesh an ideal place to propagate Ayurveda among the masses.

The deliberations and the expected outcome of the 5th WAC, to be held in Lal Parade Grounds, Bhopal, the capital of Madhya Pradesh, will further strengthen the state's health sector reform programme.

WORLD
AYURVEDA
FOUNDATION

World Ayurveda Foundation

Founded in 2011, the World Ayurveda Foundation (WAF) is an initiative by Vijnana Bharati aimed at global propagation of Ayurveda. As part of a larger intellectual movement under the aegis of the Swadeshi Science Movement undertaken by Vijnana Bharati, WAF is a platform that would take Ayurveda to the world for all the benefits mankind can draw from traditional health sciences.

WAF is a registered Society with the Charity Commissioner in the State of Karnataka with an illustrious Board of Trustees as its guiding force. Stakeholder involvement by participation, guidance, and responsible management is the hallmark of WAF. In its constitution is provided a Governing Council which would work under the general stewardship of the Board of Trustees, with substantial autonomy in annual activity plan.

The objectives of WAF reflect global scope. Propagation and encouragement of all activities- scientific and Ayurveda-related are the core principles. Support to research, health-care programmes through camps, clinics and sanatoriums, documentation, organization of study groups, seminars, exhibitions and knowledge initiatives to popularize Ayurveda in the far corners of the world are the broad latitudes of focus at WAF. Ayurveda as a sector requires the kind of stewardship and voice that genuinely bring out the ethos of Ayurveda in matters that govern policy and planning with State and Central government administration in India and the world over. WAF is positioned to provide this much-needed leadership with its wide participation of various stakeholder groups.

Ayurveda as a philosophy and science has a wide array of professional representation the world over. Students, research scholars, practitioners, therapists, public health administrators, cultivators, collectors, multidisciplinary scientific academics and industry are the prominent stakeholders of Ayurveda today. WAF is a unique platform that has the energy, represented by all these stakeholders, to provide a multidimensional, relevant, scientific, in-depth and at all times traditionally rich experiential Ayurveda voice. The impact of WAF encompasses the areas of policy, action, public health, trade, practice, science and, above all, global outreach for the benefit of society and mankind.

International Delegates' Assembly

A Glimpse of the audience

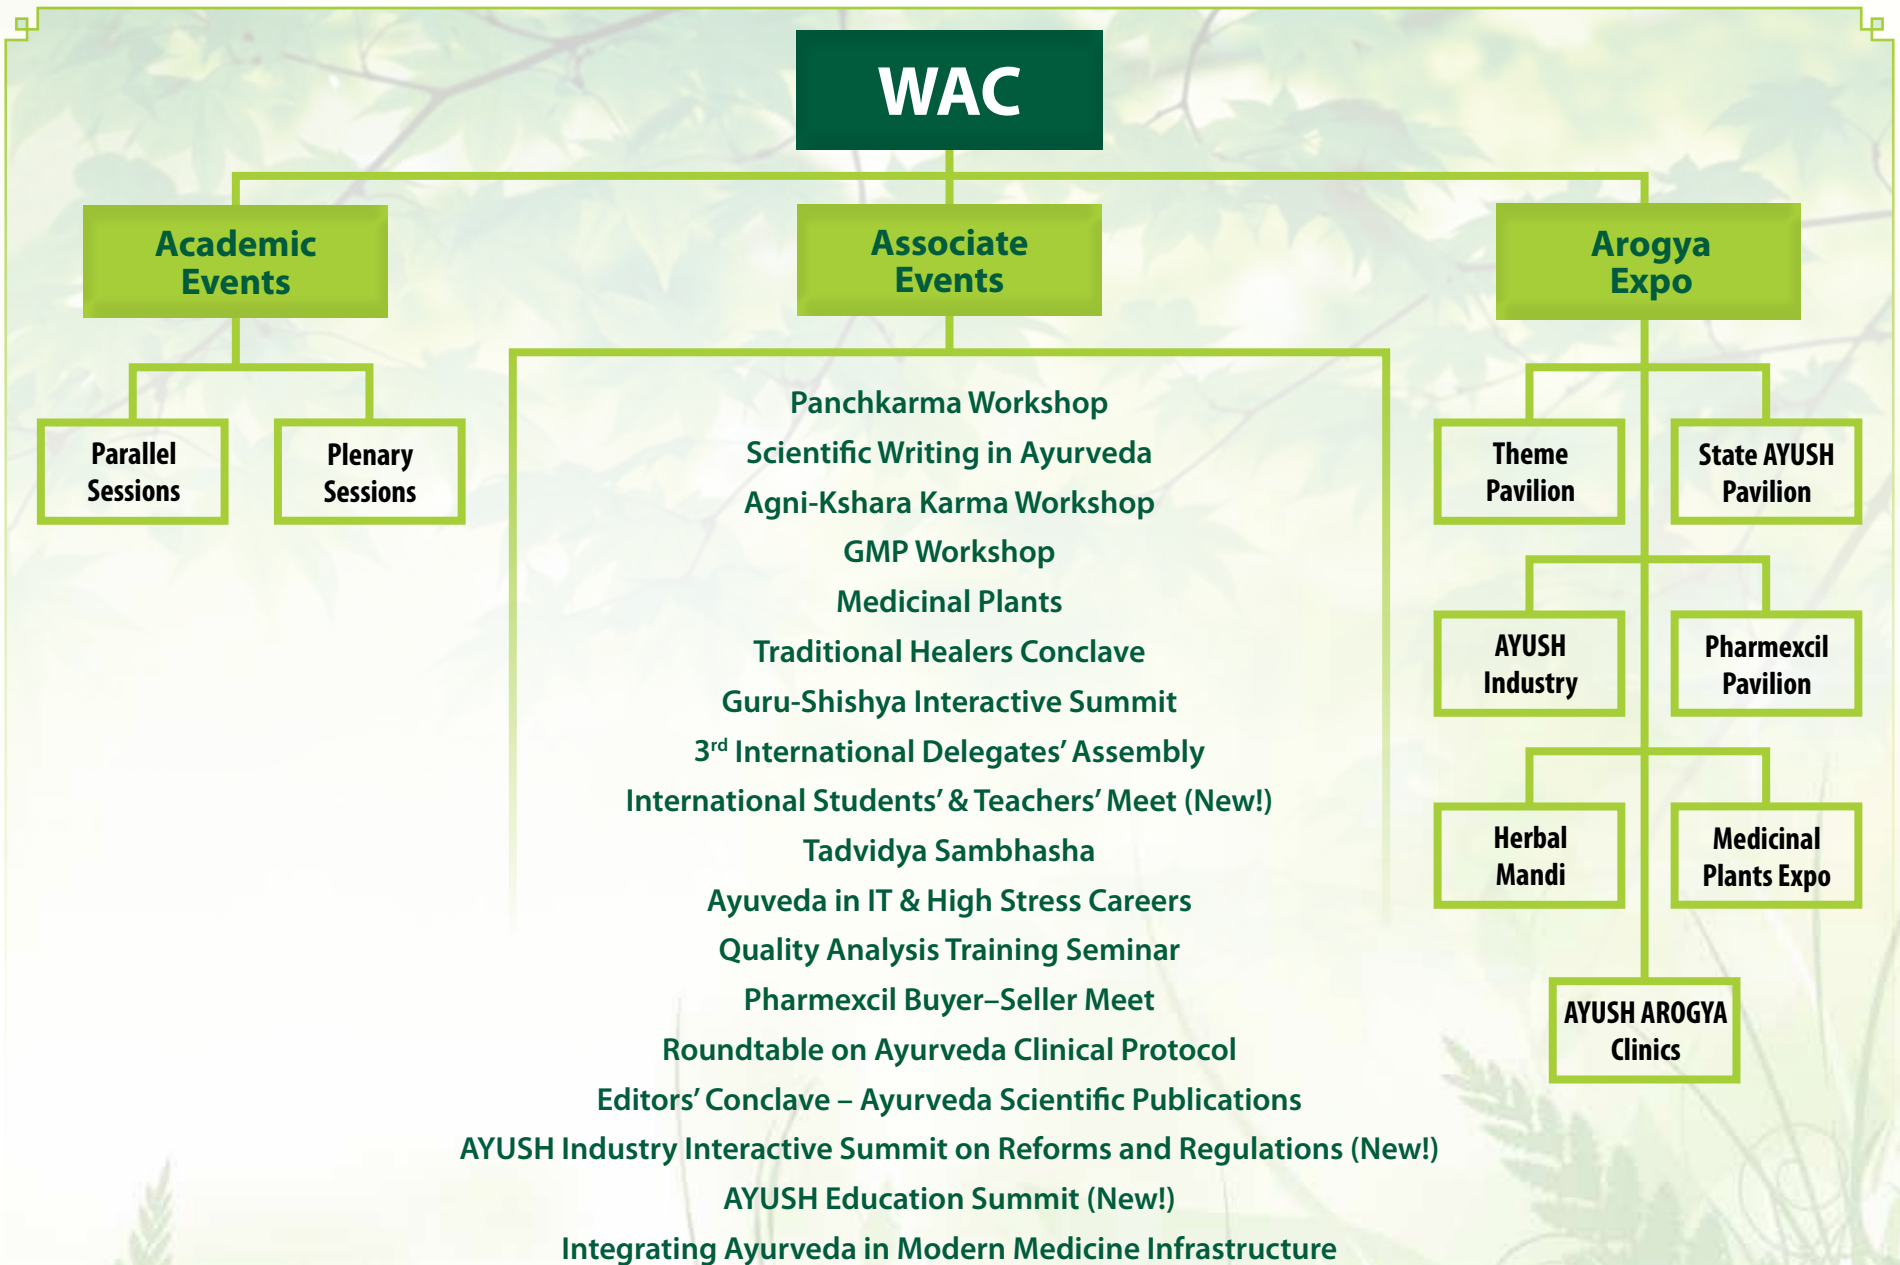

Inaugural speeches in progress

4th WAC and Arogya Expo 2010

In numbers

- **30** scientific sessions, conducted at six parallel venues
- **4270** registered delegates (264 international delegates and 2315 students)
- **14** academicians and researchers scrutinized the research abstracts
- **1277** scientific abstracts received, including 70 international entries
- **327** abstracts selected for oral presentations
- **404** entries for poster presentations
- **142** entries selected for publishing in electronic format
- About 850 speakers addressed from the various fora of 4th WAC and AROGYA Expo 2010, including the run-up events that began from 2009
- Travel and accommodation facilities arranged for over 3500 delegates and participants
- The website www.ayurworld.org witnessed 60,000 visits everyday during the event
The website continues to enjoy the patronage of thousands of visitors every day
- Participation from 447 institutions
- Participation from 23 countries and 26 states of India
- 266 stalls in the AROGYA Expo that included 11 governmental organizations and 151 private organizations
- Over 300,000 people visited Arogya Expo
- 149 active members in the state and central organizing committees
- 8 separate venues situated in different parts of Bengaluru
- Over 5000 students from 5 city colleges participated in the Walkathon
- Participation of over 10,000 school children from 62 schools participated in the painting competition; 72 winning entries displayed at the venue
- Involved the IT sector for the first time, senior employees from 20 IT companies in Bengaluru participated in the AYUR IT programme

5th WAC at a Glance

Academic Sessions of the 5th WAC

Focal theme: 'Enriching Public Health Through Ayurveda'

The academic sessions of the Congress are structured in such a way that the plenary sessions will take on the evolution of various concepts and the parallel sessions emerging from the plenary topics. The plenaries will be addressed by eminent scientists, academicians, policy makers or Ayurveda practitioners (clinicians).

Call for papers

The 5th WAC invites research papers on the following subjects:

1. Infectious diseases and Ayurveda
2. Emerging new diseases and Ayurveda
3. Immune disorders and Ayurveda
4. Immune deficiency diseases and Ayurveda
5. Cancer and Ayurveda
6. Cardiac diseases and Ayurveda
7. Metabolic diseases and Ayurveda
8. Degenerative diseases and Ayurveda
9. Yoga and Ayurveda
10. Cosmetology and Ayurveda
11. Sex and Ayurvedic interventions
12. Reproductive health and Ayurveda
13. Preventive medicine in chronic disease management
14. Mental health and Ayurveda
15. Rasayana: paediatrics to geriatrics
16. Public health and Ayurveda
17. Rural health and Ayurveda
18. Philosophical basis of Ayurveda
19. Prakruti and Sara
20. Rogee pareeksha (Ayurvedic diagnosis)
21. Richness of ahara shastra (Ayurvedic dietetics)
22. Outstanding health traditions
23. Ayurvedic surgery
24. Textual studies in Ayurveda
25. Information and Communication Technology and Ayurveda
26. Scope of biomedical engineering in Ayurveda
27. Different perspectives on Ayurveda and integrative medicine
28. Ayurveda in furthering basic science research
29. Advanced research in Ayurveda
30. Research methodology in Ayurveda
31. Translational research
32. Clinical research in Ayurveda
33. Clinical trials and pharmaco-vigilance in Ayurveda
34. Ayurveda and intellectual property rights
35. Regulatory issues of Ayurvedic drugs in specific countries
36. Shastra and industry
37. Issues related to rasa-aushadhies
38. Veterinary medicine
39. Medicines for plants
40. Sustainable cultivation of medicinal plants and trees
41. Medicinal plants for health and prosperity
42. Making Ayurveda affordable to all

All scientific abstracts/papers may be submitted online at www.ayurworld.org OR may be sent to papers@ayurworld.org

Guide lines for Scientific Sessions

Under the leadership of Dr Ajay Kumar Sharma, Director, National Institute of Ayurveda (NIA), the Scientific Committee of globally accepted experts will review the papers submitted as per guidelines outlined below. The decisions and choices of the Scientific Committee are final on all matters pertaining to the presentation and publication with regard to the Congress.

Evaluation criteria

The Scientific Committee will use stringent criteria to evaluate contributions. Please visit www.ayurworld.org for details.

The papers must be addressed to 'WAC Scientific Committee', and should be duly attested by the department/institution head.

General recommendations

- The paper's title should be clear and informative, containing key elements of the covered topic. If selected, it will also be the title of the presentation
- The target group of the conference must be kept in mind; these include researchers, practitioners, planners, manufacturers, consumer groups, and traders
- Abstracts, papers, and posters should not be used for advertising products. There is space at the Congress venue for exhibition/presentation of products
- **To submit abstracts and papers, use the online module at www.ayurworld.org. Alternatively, a pdf form that can be downloaded and filled is also provided on the website**
- Depending on the selected conference section, use the language defined in the description

above. It is the responsibility of the authors that the papers are written in correct British/US English. The editors will not do any text editing or reformatting

- All diagrams, pictures, tables, and equations should be visible and readable. As conference proceedings will be available in digital form too, colours may be used in figures. However, for the benefit of someone printing the selected document in black and white, the colours in the figures should be graded for easy recognition
- Please submit an electronic copy of the abstract and, if accepted, the paper, in Microsoft Word (name the file as: Last Name of the First Author. doc, e.g. Kumar.doc). Along with the submission, mention the section of the conference to which you are applying. Documents should be sent to <papers@ayurworld.org>
- All submitted abstracts will be peer-reviewed by the Scientific Committee. Authors will be notified of abstract acceptance by e-mail, no later than 20th September 2012

Papers

- Full papers of the accepted abstracts will be reviewed
- If accepted, the full paper should address the topic and questions brought up in the abstract
- Two papers presenting the same material based on different abstracts will not be accepted
- Deadline for submitting the paper and a presentation file (.ppt file) is 20th October 2012

Papers will be peer reviewed by the Scientific Committee before being finally accepted. Authors will be notified by e-mail of paper acceptance or rejection no later than 5th November 2012

Format for oral presentations and posters

All oral presentations will get 8 minutes followed by 2 minutes of discussion via a moderator. Outstanding submissions may be chosen for a longer presentation. Submissions must include objectives, hypotheses, methodology, and results in the abstract.

During the Congress, space will be available for a poster exhibition. Posters are graphic presentations of a scientific paper. The criteria are the same as for scientific paper.

During September 2012, a template for the poster will be made available at <www.ayurworld.org>. The poster should be then made as a PDF file and sent to <papers@ayurworld.org> no later than 20th October 2012.

Publication of abstracts

All selected abstracts of both oral presentations and posters will be published in the abstract book of the 5th World Ayurveda Congress. They will additionally appear also in the supplement edition of a peer reviewed journal, which will be announced soon.

Publication of full papers

The 5th World Ayurveda Congress is facilitating the publication of the best papers in peer reviewed and indexed research journals. Your submission cannot be considered for publication if the full paper is not submitted before 20th October 2012.

Vijnana Bharati (VIBHA)

Vijnana Bharati or VIBHA is a national movement dedicated to the integrated development of Bharat through the intervention of science, engineering, and technology. Launched in 1991 by a group of thinkers and scientists, VIBHA has, today, 21 active units spread across the country and a few overseas units as well. Eminent scientists, academicians, policy makers, and social workers are the torch bearers of this movement.

VIBHA takes the spirit of 'Swadeshi' along with the ethos of our culture. It emphasizes that science and spirituality should go hand in hand. VIBHA works towards rural development, technology transfer, and social empowerment so as to bring the fruits of advancement of science and technology for the benefit of the society. It has received two national awards for popularizing science and technology: one in 2006 from Dr Manmohan Singh, Hon'ble Prime Minister of India, and the other in 2007 from Mr Kapil Sibal, Hon'ble Minister for Science and Technology, Government of India.

VIBHA works towards national self-reliance and a developed India. Towards this mission, VIBHA adopts, adapts, and assimilates the best from everywhere and associates with the best of universities, R&D organizations, and other movements.
