

LLC "Imkoniyat Sakhovat"

Urgench, Khorezm Region, Uzbekistan

Investment proposal for cooperation with potential investors from India on creation of Joint venture on production of pharmaceutical products and items for medical purposes

**Importance.** Nowadays the pharmaceutical sector of Uzbekistan is quickly growing sector of the economy, annual production of pharmaceutical products is increased averagely at 21-23 %. But the share of import of pharmaceuticals still remains high. The local production of pharmaceuticals covers only 25% of the pharmaceutical market, there is no local production of oncological, anti-diabetic drugs, there are no medicines for emergency medical care, and modern medicines based on bio and nano technologies are missing.

**At the same time,** the state granted a number of privileges to local producers of medicines, they were released before January 1, 2021 from a number of taxes, in the newly created free economic zones for pharmaceuticals, tax privileges are granted for a longer period, and land is provided for re-injected pharmaceutical production.

One of the local initiators for the creation of pharmacy production is LLC "Imkoniyat Sahovat" (Urgench, Khorezm region, Uzbekistan), which is searching for a potential foreign partner.

**Commercial proposal for the creation of a joint business.**

LLC "Imkoniyat Sahovat" has at its disposal production premises with a total area of 9,2 thousand square meters, the height of the premises is 7 meters, the building is prepared for the installation of equipment (there is a necessary floor screed, the roof is covered completely according to the production requirements), office premises are finishing work.

Initially, these facilities were planned to accommodate modern production facilities for the production of ampoule filling medicines, infusion solutions and solid form preparations (tablets and capsules). According to the project, there is a scheme for locating rooms and equipment for GMP requirements, equipment was selected, contract negotiations with equipment manufacturers from China were carried out.

The total contractual cost of the equipment left is 6,444,421 US dollars.

The contribution of LLC "Imkoniyat Sahovat" to the investment project on pharmaceutical items production is providing with production area, expenditure towards the preparation of assembling and hook-up and start-up of the equipment, expenditure towards connection to the engineering communications (gas, water, electro energy connections).

**Expected contribution from foreign side.** Covering the expenditure towards equipment from China or alternate solution on equipment supply including “clean rooms”, technology of production and organization of management, working out the pharmaceutical items.
